

How to create organization in github:

The screenshot shows the GitHub homepage for user 'hi-sampath'. The left sidebar contains navigation links for Repositories, Recent activity, and Your teams. The main content area features a 'Learn Git and GitHub without any code!' banner, a notification 'You've been added to the mss-ec-apps-sep-2021 organization!' with a 'View organization' button, and an 'All activity' section with an 'Introduce yourself' prompt. A dropdown menu is open in the top right corner, showing options: New repository, Import repository, New gist, New organization, and New project. The Windows taskbar at the bottom shows the search bar and several application icons.

This screenshot is similar to the first one, but the dropdown menu in the top right corner is expanded, highlighting the 'New organization' option. The rest of the page content, including the sidebar, main banners, and notifications, remains the same. The Windows taskbar at the bottom also shows the same set of application icons.

How to create Repository

This screenshot shows the GitHub profile page for the organization 'DevOps-with-AWS'. The page includes a search bar, navigation links for Pull requests, Issues, Marketplace, and Explore, and a header with the organization's name and a repository icon. Below the header, there are tabs for Overview, Repositories, Packages, People, Teams, Projects, and Settings. The main content area shows a message: 'DevOps-with-AWS doesn't have any pinned public repositories yet.' Below this, there is a section for 'This organization has no repositories.' with a green button labeled 'Create a new repository'. The Windows taskbar at the bottom shows the search bar, task view, and several open applications including Chrome, VS Code, and a terminal. The system tray shows the date and time as 18:23 on 02-11-2021.

This screenshot shows the 'Create a new repository' page on GitHub. The page title is 'Create a new repository' and it includes a subtitle: 'A repository contains all project files, including the revision history. Already have a project repository elsewhere? Import a repository.' The form includes fields for 'Owner' (DevOps-with-AWS) and 'Repository name' (Git). Below these fields, there is a section for 'Description (optional)' with a text area containing 'we will use it for info share purpose'. The 'Public' option is selected under the 'Repository visibility' section. The 'Initialize this repository with:' section includes checkboxes for 'Add a README file' (checked), 'Add .gitignore', and 'Choose a license'. A note at the bottom states: 'This will set main as the default branch. Change the default name in DevOps-with-AWS's settings.' A green 'Create repository' button is at the bottom of the form. The Windows taskbar at the bottom shows the search bar, task view, and several open applications including Chrome, VS Code, and a terminal. The system tray shows the date and time as 18:28 on 02-11-2021.
